

We are the ideal partner for small- middle- and large series. Our Customers come from nearly all areas of the producing and processing industry. We deliver forged parts from 150g to 30kg. The forged blanks usually are treated mechanically and are delivered coated if desired.

Materials and production processes in modern production sites

We process case hardened steel, tempered steel, nitride steel and construction steel. Further materials on request.

Thermal treatment and coating

Heat treatments like case hardening, short time/longtime gas nitriding, tenifer treatment, Inductive hardening, tempering or coating we let carry out by partners certified according to ISO 16949.
